EDUCATION

Vivekananda Institute Of Professional Studies, GGSIPU

B.Tech in Computer Science and Artificial Intelligence; CGPA: 7.85/10.0

New Delhi, India

July 2022 – July 2026

DAV Public School CBSE; Class X: 81% (2020), Class XII: 83% (2022)

SKILLS

Languages: Python, C++, Go, JavaScript

Tools: Node.js, Express.js, Flask, FastAPI, MySQL, MongoDB, React.js, Git, Linux, Bash, Nginx, Docker, CI/CD

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, System Design, Artificial Intelligence, Machine Learning

EXPERIENCE

- **Secure Elements** — *Software Engineer, Remote* *July 2026 – August 2026*
 - Developed MCP backend servers using FastAPI and FastMCP, built PHP backend APIs, wrote SQL queries, integrated system components, and automated API validation workflows using Bruno.

INTERNSHIPS

- **Secure Elements** — *Software Engineering Intern, Remote* *March 2026 – July 2026*
 - Built Jenkins CI/CD pipelines for Yocto-based embedded systems, internal applications, and AI models. Also Engineered an automotive cybersecurity log simulator with AUTOSAR-style IDS, OTA, and UDS log generation
- **Devnovate.co** — *Software Engineering Intern, Remote* *May 2025 – January 2026*
 - Deployed and managed a full-stack application on a hardened Debian server using Nginx and PM2, implementing SSH key authentication, restricted firewall rules, and user permissions to improve server security.
 - Supported **1,000+ users** in the first week with under 300ms response times, scaling to **100k+ total users**.

FREELANCE

- Built and deployed MERN applications for madsha.com, superworldapp.com, and toabh.com.
- Developed business websites using Next.js (urbanmodish.vercel.app), Vanilla JavaScript (bh-reels.vercel.app), WordPress (cheapprintouts.com), and Wix (contourinteriors.in).
- Migrated and deployed **10+ websites** from shared hosting to a hardened Linux VPS for tridindia.com.

PROJECTS

- **Scalable URL Shortening Service** — *Go, APIs, Concurrency, Rate Limiting, Caching, Load Testing* [Link](#)
 - Built a backend URL shortening service in Go with clean REST APIs and collision-safe short code generation.
 - Implemented concurrency-safe request handling with token-bucket rate limiting, in-memory caching for hot URLs, persistent storage, and health/readiness endpoints to improve performance and reliability.
- **Cloud-Native AI Deployment Platform** — *FastAPI, React, PostgreSQL, Docker, Prometheus* [Link](#)
 - Built a cloud-native platform that deploys machine learning models as scalable inference APIs through automated containerization, model versioning, and deployment orchestration.
- **Additional Live Projects**
 - [Minimalist Snake Game](#) | [Virtual Banking System](#) | [Chef Hiring Platform](#) | [Single Layer Perceptron](#)

COMPETITIVE PROGRAMMING

- **Solved 800+** algorithmic problems across [Leetcode](#), [Codeforces](#), [TakeUForward](#), and other online platforms.
- Achieved competitive programming ratings: Leetcode (max **1675**), Codeforces (max **1081**).
- Active competitive programmer with strong algorithmic problem-solving background, participating in **50+ contests**.

STARTUPS AND COMMUNITY

- Founder of [Pipebit.dev](#), delivering custom softwares and workflow solutions for startups and growing businesses.
- Co-Founder of [Snyco.ai](#), building AI-powered workflow automation and productivity solutions for the public.
- Community Partner at [HackWithIndia](#), supporting hackathon operations and mentored **100+ teams** across globe.

OPEN SOURCE CONTRIBUTIONS

- Leveraged Linux as a daily driver since 2021 for development, experimentation, and community contribution.
- Maintained Github and Stack Overflow profiles since 2018 and 2019 respectively.
- Worked on [RocketRideServer](#) repository to fix documentation and multiple UI issues.

ACHIEVEMENTS

- **1st place** in web technologies quiz competition at VIPS-TC, Pitampura.
- **1st place** in debugging competition at Amity University, Noida.
